

# ISTQB - CERTIFIED TESTER

This ISTQB Software Testing Foundation Certificate course provides students with understanding of industry standard testing principles and terminology. The real life examples and case studies also support practical application of the learning outcomes. The course helps students prepare for the certification exam that is set, moderated, and marked by ISTQB. The Foundation Certificate is awarded to those who pass a written one hour multiple-choice exam.

#### Course Duration

3 days

#### Prerequisites

Basic understanding of manual testing and SDLC

#### Course Level

Intermediate

## Course Description

This course follows the ISTQB syllabus covering key process areas of software testing. As the course is designed to help students prepare for the ISTQB Certification exam, each chapter also includes quizzes with sample questions and students take a mock exam on the last day of the course.

## Recommended for

- Software Testers
- Test Team Leaders

## Course Materials Provided Include:

- A copy of the Foundations of Software Testing
- Presentation materials
- Exercises, quizzes and solutions
- Logon ID to course discussion forum
- Comprehensive workbook including sample test documentation

## Course Overview

- Fundamentals of testing
- Lifecycle testing
- Static techniques
- Test design techniques
- Test management
- Tool support for testing
- Preparing for the ISTQB exam

## Prerequisites

A basic understanding of manual test methods and the SDLC is advantageous.
